

## PROFILE

I'm a creative problem solver who is both technically minded and design orientated who's able to adapt quickly to new technologies and always driven and willing to learn something new. I'm looking for a developer or design role in a company that will benefit from my creativity and technical skills, and in which I can become a valued member in a great team.

## EDUCATION

### Master of Science (MSc), Computer Science

Keele University, UK | 2021 - Present

- Design and Programming [CSC 40076] - **90%**
- Web Technologies and Security [CSC 40082] - Current Module

### CS50's Introduction to Computer Science

HarvardX | 2021

### Bachelor of Science (BSc), Environmental Science

Manchester Metropolitan, UK | 2015-2019

## SKILLS

- Python | Flask
- HTML | CSS
- Javascript
- SQL | SQLite
- GIT | GITHUB
- C
- Adobe XD | UI Design

## PROJECTS

### Subzen (In-Progress) -

Subscription management web app that tracks subscription costs for different time frames. Built with Python using flask and SQLite.

## EXPERIENCE

### TECHNOLOGY SALES

#### Currys PC World | Gloucester, UK | Sep 2018 - Aug 2019

- Asked strategic questions to identify customers' needs and problems.
- Used in-depth technical knowledge to offer effective solutions.
- Achieved personal and store sales targets including being awarded "know-how champion" which gave me the opportunity to supervise other colleagues performance.

### BUSINESS BROADBAND SERVICE AGENT

#### Verestar | Manchester, UK | Mar 2018 - Jun 2018

- Solved technical issues effectively under time pressure via diagnostics through remote router access.
- Reached company policy on providing an excellent customer experience.
- Generated customer leads for extra services to maximise company profit.
